Description	<p>Anti-Fascist Action was a militant anti-fascist organization founded in the UK in 1985, by a wide range of anti-racist and anti-fascist organisations. It was active in fighting far-right organisations, particularly the National Front and British National Party. It was notable in significantly reducing fascist street activity in Britain in the 1990s. AFA had what they called a twin-track strategy: physical confrontation of fascists on the streets and ideological struggle against fascism in working class communities. Among its more notable mobilisations were violent confrontations such as the Battle of Waterloo in 1992 and non-violent events such as the Unity Carnivals of the early 1990s.</p>

Description	<p>The internet is no longer secure.As members of Anonymous, it is our duty to continue to keep the web free and to protect our privacy. Firefox and Microsoft were both mentioned as the most trusted companies for privacy and security. This is not true; rather it could be a ploy to make us feel even more comfortable while they continue to implement new tracking technologies.VPNs do nothing but hide your IP, but what about your MAC address, and the actual hosting providers IP for their firewall? No matter what you can be traced back. This is even more true for apps and mobile devices. You have no idea what is going on behind the scenes. Apps can continue to track you even after you shut off your device, and even if you have no internet connection. The tracking technologies behind apps are the biggest concern because the fact of the matter is they are watching us. The entire idea of affiliate marketing is based around proving that you are an actual person and not a bot, and to do that they think of new ways to create a digital thumbprint for every user. No plugin that currently exists is going to stop this. Even by doing a simple Google search, you are being tracked. Just look at the URL. These contain private information about each link and user associated with it to establish a trend. To have accurate information, they have to prove that you are a real person and not just a bot. It is easier than you think.We could have prevented the incarceration of Anons if we would have kept on the technology. In that regard, we are failing and losing the battle of keeping the Internet free.#OpOpenSource is an ongoing dev project that patches the web and makes the Internet 100% private again by coming out with technologies to kill tracking systems.Fellow Anons, we can collectively build an open source browser or a patch for all devices and systems that makes the Internet completely secure again...We are talking fake imprinted Mac addresses, device IDs, automatic longitude/latitude manipulation, fake IP, bot manipulators to through off tracking APIs, and automatic encryption. Thats just to start.The idea is to stay ahead of the curve and continue to patch every tracking method that comes out as soon as we can. So bring your skill sets, and what ever time you have to lend. Its time to jailbreak the web.AnonymousWe are Anonymous. We do not forgive. We do not forget. Expect us.</p>

Description	We are a chapter of the Torch antifascist network.Torch Points of Unity:1. We disrupt fascist and far right organizing and activity.2. We dont rely on the cops or courts to do our work for us. This doesnt mean we never go to court, but the cops uphold white supremacy and the status quo. They attack us and everyone who resists oppression. We must rely on ourselves to protect ourselves and stop the fascists.3. We oppose all forms of oppression and exploitation. We intend to do the hard work necessary to build a broad, strong movement of oppressed people centered on the working class against racism, sexism, nativism, anti-Semitism, Islamophobia, homophobia, transphobia, and discrimination against the disabled, the oldest, the youngest, and the most oppressed people. We support abortion rights and reproductive freedom. We want a classless, free society. We intend to win4. We hold ourselves accountable personally and collectively to live up to our ideals and values.5. We not only support each other within the network, but we also support people outside the network who we believe have similar aims or principles. An attack against one is an attack against all.

Description	<a href="https://twitter.com/AntiFascistNetw">twitter.com/AntiFascistNetw</a> The Anti-Fascist Network is a network of independent and grassroots groups working together against the rise of racism and fascism in our communities. Anti-fascists have opposed the EDL and similar groups wherever they go. The aim of the network is to support these local actions and to join together to counter regional and national far right events, ensuring maximum numbers on the streets as well as sharing resources and providing legal support. The Anti-Fascist Network is not about telling people how to campaign in their areas, what type of anti-fascist activity they should undertake or what political analysis they should adopt. We simply want to cooperate to defeat fascism. The Anti-Fascist Network is non-hierarchical, will never work with the police and is not affiliated to any political party.

Description	Antifascist of the Seven Hills ASH is organizing to fight fascists in Richmond. We seek to combat fascism as communists and anarchists united in militant opposition. Fascism seeks to reinforce white supremacy, patriarchy, and capitalism through recruitment, mobilization, and violence. We seek to combat their efforts, fighting their fire with our fire. ASH opposes capitalism, racism, sexism, homophobia, and transphobia. We therefore stand against politicians, NGOs, and the police, all of whom have a vested interest in maintaining these structures of oppression. We will fight fascists in Richmond using a multiplicity of tactics, from education to confrontation. As a burgeoning group, we are building a network that will shut down fascists in our city.
